MOROCCAN ZELLIGE & ANDALUSIAN ORNAMENT DESIGN GUIDE

**Visual direction:** a refined extension of the existing 26-page menu identity: Moroccan zellige geometry, Andalusian arches, fine gold framing, emerald fields and warm ivory surfaces. The website should feel like the menu—not like a stock-photo restaurant template.

**Scope:** non-menu website sections only. This guide does not authorize changes to the original menu pages, viewer, QR code, menu data or menu navigation.

# 1. Design system

| Token | Value | Use |
|---|---|---|
| Emerald | #064D40 | Primary brand surface |
| Deep green | #032F28 | Header, footer, deep panels |
| Gold | #D9AE4D | Borders, rules, highlights |
| Warm ivory | #F4EBDD | Editorial surfaces |
| Dark text | #17241F | Body text |
| Cobalt / terracotta | Accent only | Small zellige details |

**Principles:** thin gold outlines; geometric separators; arch silhouettes; restrained low-contrast pattern overlays; generous spacing; editorial typography. Avoid excessive rounded cards, gradients and ornamental clutter. Do not redraw the existing logo.

# 2. Section-by-section application

| Section | Treatment |
|---|---|
| Hero | Deep green/emerald geometric field; subtle girih motif; no photo. |
| Intro | Warm ivory editorial block with small rosette or narrow border. |
| Menu categories | Emerald panels and gold dividers; never invent dishes or prices. |
| Digital menu CTA | Keep approved page-01.jpg preview; add only a refined gold frame. |
| Gallery | Designed placeholder until genuine restaurant photos are supplied. |
| Promo banner | Only if the owner supplies the actual Banner AR asset. |
| Contact / Footer | Only verified details from the owner's business card. |

## 3. Included assets

**Textures:** ivory, emerald, multicolor zellige, cobalt, terracotta.
**Borders:** three horizontal zellige/girih strips.
**Frames:** mixed, emerald and ivory arches; scalloped arch; corner ornaments.
**Details:** rosettes and dividers. The ZIP includes individual crops and the full asset sheet.

## 4. Strict protection rules

Never modify the 26 original menu JPEGs, original PDF page order, menu viewer, QR code, menu data or menu links. Do not recreate or translate menu pages. Do not use generated illustrations as menu content. No stock images, external image URLs, fake reviews, awards, address, phone, opening hours or promotions.

## 5. Implementation and QA

Add assets under **public/brand/zellige/** without overwriting menu assets. Use CSS backgrounds/overlays at low contrast. Preserve Spanish, English and Arabic translations plus RTL. Verify mobile, tablet, desktop, accessibility, contrast, image loading and no horizontal overflow. Work in a new PR; do not merge or deploy before owner approval.

Decorative proposal only—not a reconstruction of the original printed menu. The actual menu remains the source of truth.
